REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

020824-001110us

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 5,877,458, granted March 2, 1999 and for which a reissue patent is sought on the invention entitled Surface Position Location System and Method,

the specification of which

is attached hereto.

was filed on September 18, 2003 as reissue application number 10/667,242and was amended on _____
(If applicable)

I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SI/2B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid for the reasons described below. (Check all boxes that apply.)

by reason of a defective specification or drawing.

by reason of the patentee claiming more or less than he had the right to claim in the patent.

by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

The at least one error upon which reissue is based includes the recitation of, *Inter alia*, a "conductor disposed to be contacted" by a user, for example, in claim 1 (col. 23, lines 49-50 of the application). The inclusion of this phrase in claim 1 renders the original patent wholly or partly inoperative or invalid, because this phrase limits the invention. Neither the phrase "conductor disposed to be contacted" by a user, nor anything similar to it, is recited in current independent claim 17. Claim 17 is therefore broader than claim 1 in U.S. Patent No. 5,877,458 in at least one respect.
